Re: Per – and Polyfluoroalkyl Substances (PFAS) in Foodservice Products

To Whom It May Concern:

In light of a number of new state laws governing perfluoroalkyl and polyfluoroalkyl substances or "PFAS" in food packaging, some of our customers have inquired as to the use of PFAS by Graphic Packaging International, LLC ("GPI"). GPI does not intentionally add PFAS to its foodservice products produced in the facilities below in order to achieve specific characteristics in its final products as contemplated by applicable state laws:

- Clarksville, TN;
- Kenton, OH;
- Pittston, PA;
- Shelbyville, IL; and
- Visalia, CA.

Please contact your sales representative if you have any further questions.

Sincerely,

Aaron Edelstein
